Mr. Chow has applied Prime Treasure at the age of 55 for himself during the Promotion Period. After the discount, he **only needs to pay USD 300,000 of the net premium*** (after 8% of Single Premium Discount) to establish the Policy with an original single premium[^] of USD 326,087, **saving a total of USD 26,087!**

The plan also allows Mr. Chow to create his own pension. Starting from the 1st Policy Anniversary, he can **withdraw USD 15,000 annually** (5% of the net premium*) for retirement living purpose until the policy matures. On the 73rd Policy Anniversary, he can also receive a **maturity benefit of USD 1,412,271**.

Withdrawal 1 1 5

- Settle by paying a **single** premium
- Starting from the **1st** Policy Anniversary : withdraw **5%** of the net premium* annually

On the 73rd Policy Anniversary[#]
Policy value reaches **USD 1,412,271** =
471% of the net premium*

* Net premium refers to the single premium after the large size discount and the relevant Single Premium Discount.

[^] Single premium refers to the single premium after the large size discount.

Remarks: The example is an assumption and for reference only. The above example does not include premium levy, and the figures listed in the example are rounded to the nearest integer. Besides the mentioned exercised options, the policy was not fully surrendered, no other policy option was exercised, and there are no claims or indebtedness. The cash withdrawal in the example is achieved by first withdrawing the accumulated annual dividends and interest (if any), and then withdrawing the Guaranteed Cash Value and related terminal dividend (if any) by means of reduction of the Units of the Policy. For details, please refer to the "Withdrawal Arrangement" section in the product brochure. Cash withdrawals will lead to the adjustment and reduction of subsequent Guaranteed Cash Value, non-guaranteed annual dividend, non-guaranteed terminal dividend, and Total Death Benefit. Cash withdrawals are subject to the Company's minimum Unit requirements. If a cash withdrawal would reduce the Units of the Policy to be less than the minimum unit amount requirement, no cash withdrawal is allowed. All the policy values in the example are calculated based on the Company's current projected dividend rate and accumulated annual dividend interest rate and are not guaranteed, therefore the illustrated withdrawal amount might not be sustainable. If there are any changes of the policy dividend declaration or accumulated interest rate, the Units may reduce earlier or later in order to withdraw the stated amount above. The actual policy value may differ from the above example. Relevant requirements set by the Company have to be met before exercising the policy options. Please refer to the Product Brochure and Policy Provisions for more information.

If the net premium* reaches USD 1 million with the withdrawal pattern above (withdraw 5% of the net premium* annually), on the 73rd Policy Anniversary, the Policy value can **reach 542% of the net premium!**
