Tax	177	84
Total portfolio	22,360	12,070

1.6.3 Any Other Material Information

- No other material information to be disclosed during this reporting period.

2 Governance Structure

The Company is committed to maintain a sound risk management in every aspect of its business and for all its stakeholders, as well as have good corporate governance practices as essential to its sustainable growth.

2.1 Board and Senior Executive

2.1.1 Board and Senior Executive Structure, role, responsibilities and segregation of responsibilities

- The Board of Director's (the "Board") role is to exercise oversight in relation to the Company. The Board provides leadership to the Company in respect of operational issues through the Chief Executive Officer ("CEO") and other executive who are authorized to act on behalf of the Board in the operational management of the Company at the Executive Committee. Any responsibilities not so delegated by the Board to the CEO and other executives remain the responsibility of the Board.
- The Company's corporate governance is implemented through a structure hierarchy, which includes the Board, the Audit Committee, the Risk Committee, the Investment Committee, the Remuneration & Nomination Committee, the Executive Committee and any other committees of the Board established by resolutions of the Board. The Board meets on a quarterly basis, or ad hoc if required. Committee reports are presented to the Board.
- The Board consists of eight directors as at 30 June 2023 which are one executive director, four non-executive directors and three independent non-executive directors, and their roles and responsibilities are outlined in the Company's Bye-Laws and comply with the regulatory requirements of Bermuda.

2.1.2 Remuneration Policy

- The Company's Remuneration Policy is designed to attract, retain and motivate talent, reward performance, and ensure compliance with relevant regulations. Remuneration arrangements take into account the Company's business priorities and performance, market practices, the regulatory environment as well as risk management considerations.
- The Company's remuneration policy provides a fixed base salary along with performance-based bonus or incentive which varies in accordance with both the Company's and individual's performance. The Company's performance is approved by the Board's Remuneration & Nomination Committee. The Human Resource department conducts periodic industry reviews to ensure compensation is appropriate

2.1.3 Pension or Early Retirement Schemes for Members, Board and Senior Employees

The Company provides all employees with pension benefits through defined contribution pension plans according to Mandatory Provident Fund Schemes Ordinance in Hong Kong SAR, whereby employees and employer make monthly contributions as a percentage of the employees' monthly basic salaries. The Company does not have any early retirement schemes.

2.1.4 Shareholder Controllers, Persons who Exercise Significant Influence, the Board or Senior Executive Material Transactions

- On 1 November 2019, Bright Victory International Limited ("Bright Victory") completed the sale of the Company and its subsidiaries to NWS. Hence, the immediate holding company of the Company is Earning Star Limited, and the Company's intermediate holding company is NWS.

- Material related party transactions are disclosed in “Note to the financial information” no. 46 in the Company’s “Annual Return under the Hong Kong Insurance Ordinance” for the year ended 30 June 2023 as duly audited by PricewaterhouseCoopers (“PwC”).

2.2 Fitness and Proprietary Requirements

2.2.1 Fit and proper process in assessing the board and senior executive

- The Company appoints members of the Board based on the individual’s expertise and work experience as well as professional judgment. Before being appointed to the Board, all candidates must undergo a rigorous recruitment and background screening. The Company has Fit & Proper Policy in place.
- Certain regulated positions e.g. a key person in a control function, must also be approved by the Hong Kong Insurance Authority.

2.2.2 Board and Senior Executives Professional Qualifications, Skills and Expertise

Below are details of the Board and Senior Executives qualifications, skills and expertise:

Dr. Cheng Chi Kong Adrian, Chairman and Non-executive Director

- Dr. Cheng is the Chairman of FTLife. He is an Executive Director and a member of the Executive Committee of NWS, the holding company of FTLife. - Mr. Ng is a member of the Audit Committee, the Risk Committee and the Investment Committee of the board of directors of the Company.
- Until January 2021, Mr. Ng was a Senior Consultant of Pramerica Holdings (Hong Kong) Limited, a subsidiary of Prudential Financial, Inc (“Prudential Financial”), which is a Fortune 500 global financial services company principally engaged in insurance, funds and investment management. Mr. Ng initially joined the Prudential Financial group in 2009 as the Managing Director & General Manager of Pramerica Asia Fund Management Limited (“Pramerica”) (a subsidiary of Prudential Financial) and had overall responsibility for the management and implementation of the business strategy and direction of Prudential Financial in China.
- Before joining Pramerica, Mr. Ng was Country Manager for the Dutch ING Group in China. During his 20-year career with ING Group, Mr. Ng held several senior roles and was instrumental in establishing new businesses, representative offices and joint ventures in Hong Kong, China and Asia. These included ING Group’s non-life operations in Hong Kong along with ING Asia/Pacific (one of the regional executive centers of ING Group), which managed the retail operations covering insurance, asset management and retail banking in the Asia Pacific region. Prior to ING Group, Mr. Ng had served at Commercial Union Assurance Company (now known as Aviva) for over 16 years in various senior capacities in both Hong Kong and Singapore.
- Mr. Ng obtained a Bachelor of Arts (Hons) Financial Services degree from Napier University of Edinburgh in the United Kingdom and a Senior Associate of the Australian and New Zealand Institute of Insurance and Finance (ANZIIF).

Mr. Ip Man Kit is the senior executive of FTLife. For qualifications, skills and expertise, please refer to the above.

2.3 Risk Management and Solvency Self-Assessment

2.3.1 Description of the risk management process and procedures to effectively identify, measure, manage and report on risk exposures

The Company implements an ERM framework adhering to the three lines of defense model. Control functions such as internal audit, risk management and compliance are clearly segregated from the main execution of business i.e. the first line of defense. Risk Management facilitates and monitors the implementation of effective risk management practices and assists risk owners in defining the target risk exposure and reporting adequate risk-related information throughout the organization. The objective is to ensure that an appropriate framework is in place, including an independent system of checks and balances, to provide assurance that risk exposures are identified, assessed, managed and reported in an effective manner. While each line of defense is independent from the others, they work closely to ensure effective oversight.

The risk management process is as follows.

- **Identification.** Identifying risks on a timely basis is an essential first step to the risk management process. The Risk Management and the Compliance functions have developed systematic processes to identify existing and new risks in the company.
- **Assessment.** Assessment of risks based on quantitative or qualitative measures is useful in establishing the level of exposure and in determining the appropriate management actions within the Company's Risk Appetite. Specific risk metrics are adopted to support the risk assessment process.
- **Escalation and Mitigation.** Following the risk assessment process, the First Line management are responsible for the timely identification and escalation of material risk developments and for the implementation of risk mitigation actions, as appropriate.
- **Reporting and Monitoring.** In addition to providing advice, guidance, support and challenge to the First Line, the Second Line is responsible for monitoring First Line activities and reporting to the Risk Committee the performance of the First Line against risk metrics and limits defined in the Risk Appetite. In addition, to ensure the effectiveness of the Risk Management Process, an Own Risk and Solvency Assessment ("ORSA") is performed regularly to assess the company's risk profile and the adequacy of its risk management, and regular ERM reports are presented to the Risk Committees for review.

2.3.2 A description of how the risk management and solvency self-assessment systems are implemented and integrated into the Company's operations including strategic planning and organisational and decision-making process

- The Company implements an ERM framework adhering to the three lines of defense model. Control functions such as internal audit, risk management and compliance are clearly segregated from the main execution of business i.e. the first line of defense. Risk Management facilitates and monitors the implementation of effective risk management practices and assists risk owners in defining the target risk exposure and reporting adequate risk-related information throughout the organization. The objective is to ensure that an appropriate framework is in place, including an independent system of checks and balances, to provide assurance that risk exposures are identified, assessed, managed and reported in an effective manner. While each line of defense is independent from the others, they work closely to ensure effective oversight.
- On top of the ERM framework described above, the Company considers impact on regulatory compliance, capital and solvency, amongst other things, in its operations, strategic planning and decision making process. The Company's risk appetite and CISSA capital takes into account all the solvency regimes to which the Company is subject, including the Bermudan solvency and capital requirements. The Bermudan solvency position is monitored against the risk appetite and the result is reported to the Financial and Insurance Risk Committee, Risk Management Committee, and to the Board via Risk Committee regularly. The solvency self-assessment results will be reported to the above committees and the Board.

2.3.3 A description of the relationship between the solvency self-assessment, solvency needs, and capital and risk management systems

- The Company's solvency is assessed and monitored regularly by the Actuarial function. Stress testing is conducted to assess the solvency under specified stress events according to the Company's Risk Tolerance. Management information arising from the solvency stress testing is used to assess the capital required to support the Company's business objectives.

- The solvency position is reviewed by the Risk Committee. The Company's solvency is also assessed based on the stress scenarios specified by the Risk Management function in the calculation of Commercial Insurer's Solvency Self-Assessment capital.

2.4 Internal Controls

2.4.1 Compliance Function

- The Company's Vice President and Head of Compliance has the responsibility to monitor and report regulatory changes in the relevant jurisdictions and compliance with applicable existing laws, including regulatory reporting and public disclosure requirements. The Vice President and Head of Compliance monitors compliance with organizational compliance policies and procedures and adherence to the Company's Principles of Business Conduct. All material violations are reported to the Board and corrected accordingly.

2.4.2 Internal Control System

- The Audit Committee (AC) is delegated with the authority by the Board to provide independent oversight of the Company's financial reporting and internal control systems in particular to the risk management system and regulatory compliance, and the adequacy of the internal and external audits. The AC is provided with sufficient resources to perform its duties, including support, as necessary, from the Internal Audit Services, the external auditor, legal counsel, regulatory compliance and management, in examining all matters relating to the Company adopted accounting principles and practices, and in reviewing all material financial, operational and compliance controls.
- In addition to Internal Audit, the Company uses the services of external consultants to perform independent assessments of the internal control system. If any deficiencies or material weaknesses are found, they are documented and presented to the Board.

2.5 Internal Audit

- The Head of Internal Audit is authorised by the AC to have complete and unrestricted access to any of the Company's records, properties and personnel, and also has direct access to the Board through the AC to deliver reasonable assurance pertaining to the quality of governance, risk management and control processes. To ensure Internal Audit remains independent, the Head of Internal Audit has a clear hierarchical position in his/her respective legal entity structure. Its employees are not authorized to perform any operational duties or approve any transactions in the organization.

2.6 Actuarial Function

- The Company's Appointed Actuary is responsible for leading the Actuarial function and providing professional, independent advice to the company on its financial condition, particularly related to its insurance liabilities.
- Key objectives of the Actuarial function are to:
 - develop and maintain appropriate methodology for valuation of the Technical Provisions, in compliance with regulatory requirements outlined by the Authority.
 - monitor the Company's actual experience and set the best estimate assumptions on a regular basis.

- perform the valuation of the technical provisions and ensure its reasonableness with consideration of the nature, scale and complexity of the Company's business.

2.7 Outsourcing

2.7.1 Outsourcing Policy and Key Functions that have been Outsourced

- The objective of the Outsourcing Policy is to provide a set of guidelines or principles in case outsourcing of activities is considered, prepared or made operational following the requirements of local regulations.
- The policies outline the criteria for the selection of third-party service providers and the due-diligence procedures to be undertaken to monitor performance and provide oversight of such arrangements.
- The Board and management are responsible and accountable for adequate control of the business processes whether outsourced or not. Part of this control is a proper (continuous) risk assessment, adequate measures and monitoring.
- Key Functions that have been outsourced:
 - Asset management of (non-unit linked) invested assets of the Company.
 - Document printing and distribution services.

2.7.2 Description of Material Intra-Group Outsourcing

- There is no material intra-group outsourcing.

2.7.3 Other Material Information

- There is no other material information related to outsourcing.

3 Risk Profile

The Company is exposed to a variety of risks including but without limitation financial risk, insurance risk, operational risk, compliance risk and strategic risk.

3.1 Material Risks the Insurer is Exposed to During the Reporting Period

The Company is exposed to a variety of risks which are financial risks, insurance risks, operational risks, compliance risks and strategic risks. The Company maintains a detailed risk taxonomy to ensure all risks are identified and systematically managed. The principal risks and their definitions are summarized below:

RISKS	DEFINITION
Financial Risk	The risk of loss arising from asset-liability mismatches, financial market volatilities, counterparty defaults or failures to maintain sufficient liquidity for meeting business requirements or obligations.
Insurance Risk	The risk arising from changes in claims experience as well as more general exposure relating to the acquisition and persistency of insurance business. This also includes changes to actuarial and investment assumptions regarding future experience for these risks. The risk also covers the life insurance claims or losses directly resulting from catastrophic events.
Operational Risk	The risk of loss arising from inadequate or failed internal processes, personnel or systems, or from external events.
Compliance Risk	The risk of legal or regulatory sanctions, material financial loss, or loss to reputation as a result of failure to comply with laws, regulations, rules, related self-regulatory organisations standards, and codes of conduct applicable to the business.
Strategic Risk	The risk of the current and prospective impact arising from adverse business decisions, improper implementation of decisions, or lack of responsiveness to industry changes. Strategic risk is a function of the compatibility of the Company's strategic goals, the business strategy developed to achieve those goals, the resources deployed against these goals, and the quality of implementation.

3.2 Risk Mitigation in the Organisation

- The Company has adopted the 'Three Lines of Defense' model to manage the risks in the organization. First line managements are responsible for the timely identification and escalation of material risk developments and for the implementation of risk mitigation actions, as appropriate.
- The Company uses various techniques to manage risks, including:
 - Appointment of Risk Owners.
 - Risk and Control Self Assessments (RCSA).
 - Risk Register Report monitoring.
 - Internal Incidents reporting.

- Specific for financial risks and insurance risks - asset allocation, hedging, product design or repricing.

3.3 Material Risk Concentrations

The Company has established investment policies and limits governing concentrations risk arising mainly from its investment activities in single counterparty, industry sector and geographic exposures. Any potential activity that may breach the concentration limits has to be reviewed by the Risk Management function and approved by the designated executives and committee according to the Company's investment policies.

3.4 Investment in Assets in accordance with the Prudent Person Principles of the Code of Conduct

- The Company's investment portfolio is managed in accordance with the Company's investment policy guidelines. These guidelines require investment in good quality assets to support insurance liabilities to ensure that claims can be paid on a timely basis.
- These guidelines are reviewed on an annual or as-needed basis if any significant deviations have occurred that affect the financial markets.

3.5 Stress Testing and Sensitivity Analysis to Assess Material Risks

The Company performs the stress testing to provide assurance that the capital is to adequately maintain regulatory solvency and withstand adverse financial risk events. The stress test results are reviewed regularly by relevant committees.

In compliance with Bermuda regulations, nine prescribed financial market scenarios were tested, including equity shock, property shock, interest rate shock, credit spread shock, inflation shock, liquidity shock, etc. Three self-selected underwriting scenarios were also tested, including mortality and morbidity shock, lapse shock and catastrophe shock. In addition, a worst-case annual aggregate loss scenario with combined shock and a reverse stress testing scenario were conducted. The detailed assumptions and outcomes are submitted to the BMA in schedule V(e).

Based on the latest results of the stress testing and sensitivity analysis, the Company believes that it has sufficient capital and liquidity to comply with the contractual obligations of the organisation and regulatory requirements upon experiencing losses within its risk tolerance.

4 Solvency Valuation

4.1 Valuation Bases, Assumptions and Methods to Derive the Value of Each Asset Class

The Company has considered the valuation principles outlined by Authority's "Guidance Note for Statutory Reporting Regime" for the reporting period's statutory filing. The economic valuation principles outlined in this document are to measure assets and liabilities on a fair value basis (which is the value that would be received upon the sale of an asset or paid to transfer a liability in an orderly transaction between open market participants at the measurement date). The fair value principles used for the assets are as follows:

- **Cash and Cash Equivalents** – includes cash time deposits. The fair value of these holdings is measured at amortised cost using the effective interest method which approximates the fair value.
- **Fixed Income Securities** – are valued based on quoted market prices, where available. For those securities not actively traded, fair values are estimated using values obtained from brokers or using mark to model valuations by discounting expected future cash flows using a current market rate applicable to the yield, credit quality and maturity of the investment.
- **Equity and Investment Funds** - are valued based on quoted market prices or, if unquoted, on estimated market values generally based on quoted prices for similar securities.
- **Hedge Funds and Limited Partnerships** - are measured based on the net asset values estimated by reference to the quoted market prices of underlying investment or based on valuation provided by the general partner or manager of each investment.
- **Investment properties** - are independently valued and verified by independent external valuation experts bi-annually. It is based on active market prices, adjusted if necessary for any difference in nature, location or condition of the specific asset.
- **Policy Loans** - are measured at amortised cost which approximates the fair value.
- **Loans to Individuals** - are measured at amortised cost less any impairment losses because of immaterial differences between amortised cost and fair value (short term receivables)
- **Accounts Receivable and Premium Receivable** – are measured at amortised cost less any impairment loss because of immaterial differences between amortised cost and fair value (short term receivables).
- **Derivative Financial Instruments** - are valued using market transactions and other market evidence whenever possible, including market-based inputs to models, model calibration to market clearing transactions, broker or dealer quotations or alternative pricing sources with reasonable levels of price transparency. The fair value is provided by the derivative counterparties which are determined by discounting the contractual future cash flows and relevant foreign exchange forward rates and swap curve.

4.2 Valuation Bases, Assumptions and Methods to Derive the Value of Technical Provisions

- Insurance technical provisions are valued based on best estimate cash flows, discounted to reflect the time value of money using rates of interest consistent with those supplied by the Authority (where available). Standard Approach is applied. The technical provisions

are calculated as the sum of Best Estimate Liabilities (“BEL”) and a Risk Margin. The fair value of technical provisions is calculated by risk neutral stochastic valuation techniques, following the EBS principles which require taking into account management actions/policyholder behaviour and valuing embedded options and guarantees subject to market risk.

- The data used to measure the insurance reserves in the audited financial statements are also used to value the insurance technical provisions. Cash flows are projected based on best estimate assumptions without provision for adverse deviations.
- In addition, there is a risk margin to reflect the uncertainty contained inherent in the underlying cash flows, which is calculated using the cost of capital approach and the rate prescribed by the Authority for each reporting period.
- At 30 June 2023, the total Technical Provisions amounted to HKD 58,591m comprising the following:

	HKD million
Total gross long-term business insurance provisions	56,135
Reinsurance recoverable	478
Risk margin	1,978
Total Technical Provision	58,591

4.3 Description of Recoverable from Reinsurance Contracts

Reinsurance contracts mainly take the form of surplus and quota share arrangements. Receivables from reinsurance contracts are valued using the same methodologies and principles that are also used to value the insurance technical provisions.

4.4 Valuation Bases, Assumptions and Methods to Derive the Value of Other Liabilities

Similar to the valuation principles for assets, the Company’s liabilities follow the valuations principles outlined by Authority’s “Guidance Note for Statutory Reporting Regime” which values liabilities at a fair value basis.

All other liabilities (except for Interest-bearing Liabilities and Derivative Instruments) are valued on an IFRS basis.

Interest-bearing Liabilities are valued at quoted market prices. If unquoted, fair values are estimated using mark to model valuations by discounting expected future cash flows using the rates that consistent with those supplied by the Authority.

Derivative Instruments are valued at the same method as Derivative Financial Instruments in asset side.

5 Capital Management

5.1 Eligible capital

5.1.1 Capital Management Policy and Process for Capital Needs, How Capital is Managed and Material Changes During the Reporting Period

- The capital management objective of the Company is to maintain sufficient capital to ensure that the Company operates within its risk appetite while achieving its strategic objectives.
- The Risk Appetite Statement of the Company is supported by three Risk Tolerance Pillars: Capital and financial strength, earnings variability and protection of franchise value. The first Risk Tolerance Pillar defines the capital requirements of the Company.
 - **Capital:** “Capital must be sufficient to meet the minimum regulatory required level under both business-as-usual and stress scenarios”
 - **Financial strength:** “Maintain sufficient capital and a high level of risk management standard to sustain an investment grade rating issued by international reputable rating agencies.”

5.1.2 Eligible Capital Categorised by Tiers in Accordance With the Eligible Capital Rules

- Only Tier 1 capital is held by the Company at the end of the reporting period.

	HKD million
Tier 1	16,854
Tier 2	0
Tier 3	0
Total	16,854

- Both Minimum Margin of Solvency (MSM) and the Enhanced Capital Requirement (ECR) are fully funded by Tier 1 capital, which fully complies with the limits set in the Insurance (Eligible Capital) Rules.

5.1.3 Transitional Arrangements of the Eligible Capital Rules

- FTLife does not make use of the transitional arrangements in this reporting.

5.1.4 Factors Affecting Encumbrances Availability and Transferability of Capital

- Regulatory solvency margin is legal minimum capital level in Hong Kong defined by the Hong Kong Insurance Ordinance and below which the regulator usually has the right of full intervention.

The Company needs to hold capital exceeding the Minimum Acceptable Capital, (MAC) below which the IA (Insurance Authority) will intervene in the management of FTLife. The regulatory intervention at this level will typically require that new business ceases until a plan to restore capital above the level is in place, so this is used as FTLife’s MAC. It is set at 150% of regulatory solvency margin which is defined by the Hong Kong Insurance Ordinance .

Non-transferable own funds as of 30 June 2023

= BMA Economic Capital and Surplus – HKIO Available Statutory Surplus

= BMA Economic Capital and Surplus - (HKIO Statutory Surplus – Minimum Acceptable Capital)

= 16,854 – (8,207 – 150% x 2,507)

= 16,854 – 4,446

= 12,408 (HKD m)

5.1.5 Ancillary Capital Instruments Approved by the Authority

- There is no ancillary capital instruments

5.1.6 Identification of Differences in Shareholder’s Equity as Stated in the Financial Statements Versus the Available Capital and Surplus

Other than the impact of employing statutory-based technical provision valuation techniques, significant differences between HKFRS shareholder equity and available statutory capital and surplus include the reduction in available statutory capital for deferred acquisition cost, advances to agents and other intangible assets.

5.2 Regulatory capital requirements

5.2.1 ECR and MSM Requirements at the End of the Reporting Period

At the end of the reporting period, the Company’s regulatory capital requirements were assessed as follows:

Requirement	HKD million
Minimum Margin of Solvency	1,147
Enhanced Capital Requirement	4,031

5.2.2 Identification of Any Non-Compliance with the MSM and the ECR

The Company was compliant with the MSM and ECR requirement at the end of the reporting period.

5.2.3 A Description of the Amount and Circumstances Surrounding the Non-Compliance, the Remedial Measures and Their Effectiveness

Not Applicable.

5.2.4 Where the Non-Compliance is not Resolved, a Description of the Amount of the Non-Compliance

Not Applicable.

5.3 Approved Internal Capital Model

Not applicable - the Company has not applied to have its internal capital model approved to determine regulatory capital requirements.

6 Subsequent Events

- There is no significant subsequent event after 30 June 2023.

7 Declaration

We declare that to the best of our knowledge and belief, the information in this Capital and Solvency Return fairly represents the financial condition of the Company in all material respects.
